TRUMP – TAXES – HORSES - ALLIGATORS

This President who was going to drain the swamp once again promotes the long discredited economic plan which asserts that a tax cut for the wealthy would be good for the working classes. [[Editorial NYT](#)] The late John Kenneth Galbraith gave the coups de grâc to this proposition with his usual precision: “Trickle-down theory - the less than elegant metaphor that if one feeds the horse enough oats, some will pass through to the road for the sparrows.”

Trump’s trickle-down tax-cut plan would have the same effect as would adding more alligators to the swamp of Houston’s deluge in the belief that they would help in the clean up.
